

## Lesson 6: The Solution of a System of Linear Inequalities Part 2

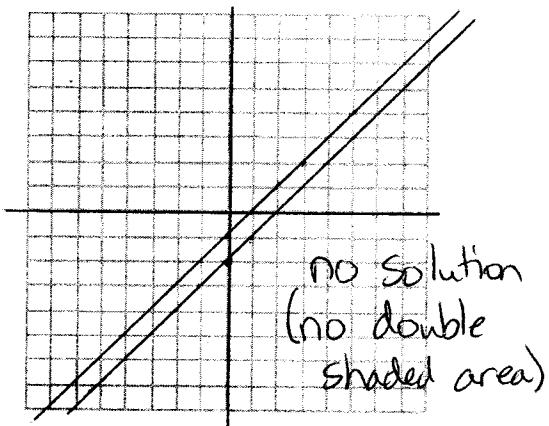

When graphing using the calculator we can use the reverse shading button (to the left of the Y=) to make it easier to find the solution. Note: the direction of the sign tells you where to shade.

Determine the solution to the following using the calculator:

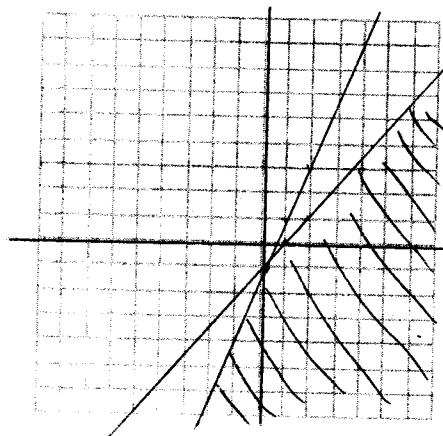

$$\begin{aligned} 1) \quad & y \geq x + 4 \\ & y \leq 2x + 3 \end{aligned}$$

$$\begin{aligned} 2) \quad & y \geq x - 1 \\ & y \leq x - 2 \end{aligned}$$

$$\begin{aligned} 3) \quad & x - y \geq 1 \quad -y \geq -x + 1 \quad y \leq x - 1 \quad (4) \\ & 2x - y \geq 1 \quad -y \geq -2x + 1 \quad y \leq 2x - 1 \end{aligned}$$

$$\begin{aligned} & 2x + y \leq 10 \quad y \leq -2x + 10 \\ & y - x \leq 2 \quad y \leq x + 2 \\ & x \geq 0, \quad y \geq 0 \end{aligned}$$
